## **Write-It-Right & Write-It-Left**

### **Skill-trainers for teaching children to write properly without feeling tired**

If you want to master easy, fast and fantastically beautiful handwriting, you should learn how to hold a pencil (or pen) in the correct position. This skill-trainer makes your child's fingers hold the pencil (or pen) correctly without any effort while you are teaching him to draw and write. Our product makes writing with a pencil (or pen) very easy and comfortable!

There is no need for an adult to supervise the child, tell him how every finger should move, and control the angle between the pencil (or pen) and the paper. It's enough to show him once or twice how to use this skill-trainer.

Traditional copy-books are not meant for teaching left-handers to write clearly. Our special skill-trainer for left-handers allows them to learn neat and beautiful handwriting.

We also have a special product for those children and adults (right-handed) who are already used to holding a pen improperly. It will help them to master correct writing skills very quickly. Here the fingers are more fixed than in the normal Write-it-Right trainer, and it works so effectively that you will see yourself that one *really* can make an old dog learn new tricks!

Skill-trainers Write-It-Right & Write-It-Left help children to master the absolutely correct slant of the pencil or pen and the correct finger position during writing, as well as solving three problems:

1. Clarity: the child learns to write clearly and beautifully
2. Speed: the child learns to write quickly
3. Fatigue: the hand does not tire when writing for a long time

Attention: parents, kindergarten supervisors and primary school teachers!

Our tests show: Skill-trainers really helps teachers and parents.

Recommended for teaching children over 2½ years old and, for right-hand writing correction, over 6 years old, teenagers and adults.

**for left-hand writing**

**for right-hand writing correction**

**for right-hand writing**

Skill-trainers Write-It-Right & Write-It-Left help children to master the right slant of the stylus and the correct finger position during writing on a Tablet PC.

**Skill-trainers Write-It-Right & Write-It-Left** are not pen or pencil grips but unique skill-trainers for teaching children to write or correcting the wrong writing technique of children and adults.

## Witty-Eating Spoon

### Skill-trainer for teaching children to hold a spoon properly

Attention: parents and kindergarten supervisors!

It is so important to teach your child to help himself from the very beginning! Every mother knows that one of the first significant baby skills is holding a spoon. Your baby will eat with real pleasure only when he is allowed to do it himself. He will do it when he knows how to hold a spoon and use it right while eating.

Our special skill-trainer allows you to make the process easy and amusing. Its shape is specially designed to permit only one possible finger

position – the correct one. It lets the skills be acquired subconsciously.

The Witty-Eating trainer protects your child's fingers from being hurt by the spoon's rough edges.

It can be used on a teaspoon as well as on a small tablespoon. It's a great way to learn!

The trainer can be used for teaching a left-hander to hold a spoon in his right hand.

Recommended for children between 2 and 7 years old (both for right-handers and left-handers).

## PC Wonder-Bracelet

### Wrist protection and comfort for working with PC mouse and keyboard

If you work at your computer a lot, you may well have experienced an uncomfortable feeling in your wrist. It appears from the constant pressure on the table surface that constricts your nerve fibres and hurts your bones and cartilaginous tissue. This can lead to the notorious RSI (repetitive stress injury) – inflammation and pain of the affected tissues. The Computer Bracelet assures a comfortable position of your wrist while you are working with a PC mouse or keyboard. It looks elegant and stylish. And, most importantly, it relieves the pressure on your hands and is the easiest and most effective way of preventing RSI!

*BraceLET your hand be free from RSI threat!*

for teenagers and adults for kids and others having thin wrists

## Feaster's Tricks. Skill-trainer for eating with chopsticks

This trainer lets you learn to use chopsticks to look confident and feel like a pro, even if it's your very first time in an Oriental restaurant!

The skill-trainer assures a correct position for your fingers when holding the sticks. It allows you to learn how to use traditional Oriental chopsticks quickly and effectively.

This trainer also develops manual dexterity and will be useful for those suffering from ICP (infantile cerebral paralysis) or recovering from a stroke.

The skills are acquired subconsciously, which means at a deeper lever of knowledge.

Scientists take a lot of interest in chopsticks. First of all, they develop our fingers. According to Japanese scientists, when we eat with chopsticks, we use 80 joints and 50 muscles of the shoulder, forearms, palm and fingers, as well as our brain. So eating with chopsticks not only develops manual dexterity but also trains our brain.

For many Asian people, chopsticks are an integral part of life.

Recommended for children over 7 years old, teenagers and adults.

## Inventor. 3D-construction set and intelligence trainer

Creative solution for a creative family!

People everywhere are obsessed with computer games, and so there are very few real and live games left to play with your family - especially games that develop imagination, abstract thinking and manual dexterity.

The INVENTOR is an educational family game that will be interesting for both kids and adults. The universal 3D-construction set is made of soft, flexible elements that stimulate intellectual development. It gives adults the rare chance of showing their children a fine example of creativity.

The construction set allows you to create figures of animals, abstract figures and anything else that you can imagine. Each new added element increases the number of possible combinations and figures. A child not only gets pleasure playing with mom and dad but also learns to create and acquires useful skills that will help him to succeed in school. No templates and standards – create what you want!

The set includes four fascinating tests that help to measure the level of intellectual development and creative imagination of children aged 3-5, 6-8, 9-12 and over 13.

Recommended for children over 3 years old and teenagers.

## **Funny Animal Theatre: Toddler Baby Elephant** **Finger trainer for the development of fine motor skills and hand coordination**

Attention: parents and kindergarten supervisors!

Put the skill-trainer on your fingers, as shown in the picture. Now teach the baby elephant to move. This playful exercise will assist in the development of fine motor skills and hand coordination. The baby elephant can walk, run, sit down on its rear legs, play football, raise different objects with its trunk, turn a ring with its trunk, and perform other tricks that the child can invent.

Made of soft and flexible material, the Toddler Baby Elephant easily fits on the five fingers of the child's either hand.

After the child plays for a few weeks with the finger trainer, you'll be surprised how strong his hands become, how quickly he writes, and the stamina and dexterity with which he performs complex tasks with small objects.

The Toddler Baby Elephant is a 3-in-1 game: an intelligent finger trainer, a tabletop game, and a travel game.

Recommended for children aged 3-7 (for right and left hand).

### **Funny Animal Theatre: Toddlers**

Nowadays people spend a lot of time looking at screens and pressing buttons. Children lack live games in which they could create stories themselves and move the characters directly by holding them with their fingers.

Funny Animal Theatre makes this possible. It is a truly developing and training toy. The characters of the children's theatre are lovely animals that become alive with a slight movement of the hand. Just put your child's fingers in the toy and move them a little, and the funny hero is here, ready to play.

Each funny animal has its own personality: are called "Toddlers". Together with your child, they learn how to communicate and behave correctly in different real situations!

"Toddlers" are animals operated by fingers. They can walk and run.

Funny animals are great assistants for studying the art of theatre performance. Theatre games with "Toddlers" create an emotional uplift, raise your child's vitality and help him to develop his personality.

Funny animals are unique for the development of a child's imagination, thinking and figurative speech. They activate information processes and improve manual dexterity that allows the child to control his movements better!

The products UNIK-UM are light and compact; they are quickly shipped to all countries from our warehouse in Bulgaria by postal and courier services.

The products' packaging is made of translucent blister with a European hanger and inserted cardboard sheets displaying text in English, German, Spanish, French, Italian, Russian or Bulgarian (language to be chosen by the buyer).
